

CONTOUR HD 4.8W LED STRIP

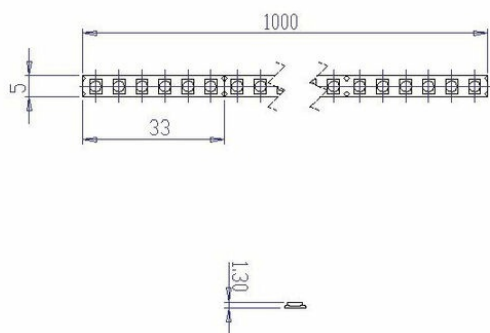

4.8W HD27/24 LED STRIP

The Contour range of products are used to provide versatile linear LED lighting. The LED strip can be used to create a multitude of different solutions. It can highlight features such as joinery, stair treads, coving or under cabinets to create floating effects where you require a line of light rather than a point source. These fantastic flexible strips are ideal for adding balance, depth and variety to your lighting scheme.

A range of profiles ensures enables the strip to be precisely integrated and also help avoid a "dotty" effect. Contour strips can be cut every 33.3mm and are sold by the metre.
