JOINERY

ELEGANT LIGHTING SOLUTIONS

JOINERY LIGHTING CONSIDERATIONS

Joinery lighting is a great architectural lighting tool, which adds an indirect softness and at the same time creates a feature in the room. Here are a few elements to consider to help you select the right choice:-

SURFACES

Think about the surfaces used by your joinery. If they are reflective such as mirror, glass or marble, then you will need to ensure you minimise glare. If your surface is matt, this is less of an issue.

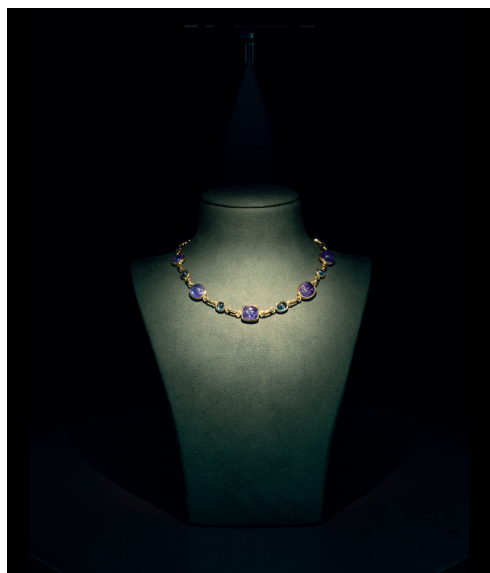

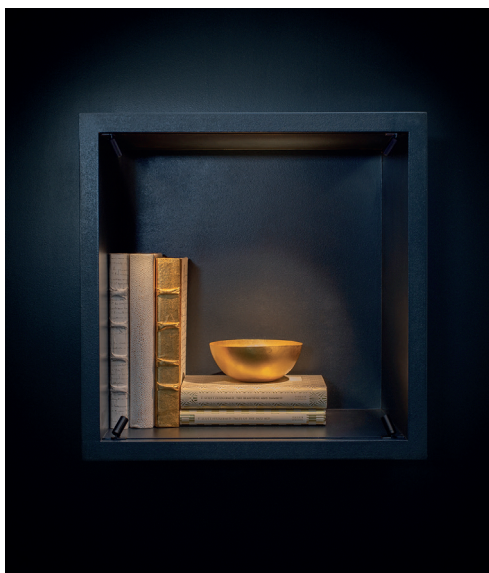

JOINERY CONTENT

Consider what are you displaying on your shelves before you start. This will help ensure the right lighting to suit the objects you wish to show.

EYELINE

Always ensure that the light is concealed from your eyeline to minimise glare. For example on stairs or shelving, consider using an upstand, fitting or profile with a baffle to shield the light source from view.

VORSA DOT

Bring focus to what matters with the smallest track mounted luminaire on the market – the Vorsal Dot.

FLOOD AND SPOT

With a choice of flood or spot luminaires, multiple different optics and 5 different snoots, it allows your lighting to be as tailored as your display.

VERSATILE INSTALLATION

An innovative proprietary track with multiple mounting options offers maximum control with independent dimming levels.

FUNCTIONAL FINISHES

Both the Dot and track come in black and silver to suit your interiors.

TECH SPEC

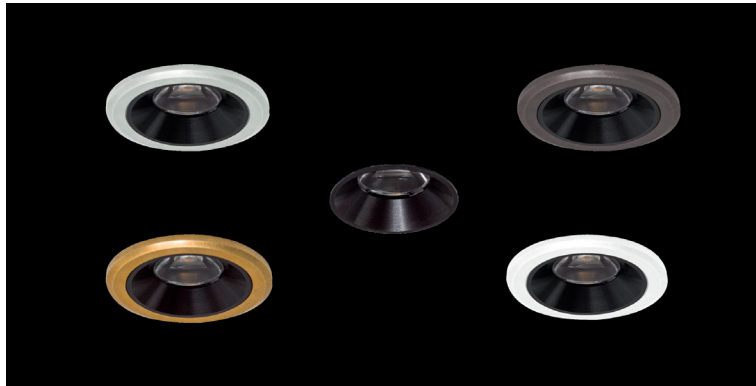

LUMENS:	65LM
CRI:	97
R9 VALUE:	>90
CCT:	2700K - 4000K
POWER:	1.3W
SIZE:	Ø12 x 31mm high
BEAM:	17°/26°/42°/98°

MINIM

MINIM

The Minim is a miniature luminaire which revolutionises joinery lighting, so tiny it disappears into your scheme. It may be small but delivers over 70 lumens and a high CRI of 97 showing objects in their true light. The Minim comes in various beam widths and finishes to suit your display.

TECH SPEC

LUMENS:	70LM
CRI:	97
CCT:	2700K
POWER:	1W
BEZEL:	Ø15/20 with bezel
RECESS DEPTH:	18/17.4mm with bezel
BEAM:	19°/40°/85°
FINISHES:	Black, brass, bronze, nickel, white

LUCCA 30

The Lucca 30 is a versatile luminaire that can be used in different ways to illuminate your joinery. Whether you are lighting columns, arches, window reveals, steps or shelving, the mini Lucca 30 is an ideal solution. Being IP67, it can also be used to light a niche in a bathroom.

TECH SPEC

LUMENS:	73.4LM
CRI:	>90
CCT:	2700K
POWER:	1W
BEZEL:	Ø30
RECESS DEPTH:	34mm
BEAM:	11°/18°
FINISHES:	Black, brass, bronze, stainless steel, white

CONTOUR HD27

CONTOUR LINEAR

Our Contour LED strips can be used in numerous ways to light up your joinery.

BACK LIGHTING

One of our favourites is to back light shelving. This throws the objects into silhouette creating a dramatic effect.

FRONT LIGHTING

This technique is ideal when you want to show more detail of the object or when lighting books.

STAIR LIGHTING

Contour LED strip can be concealed under each stair tread to create incredible floating effects on open stairs.

PROFILES

We offer a range of profiles to house the LED strip. These not only ensure easier installation but also protect and shield the light source and help avoid a “dotty” look.

TECH SPEC

LUMENS:	810LM/m
CRI:	97
CCT:	3000K/2700K/2400K
POWER:	9W
SIZE:	8 X 2mm
BEAM:	120°

ETTA

UNDER CABINET LIGHTING

The Etta is a precision engineered under cabinet luminaire that can also be used for recessed task and display lighting. It is suitable for under shelf lighting, bespoke cabinetry, kitchens and marine lighting.

TECH SPEC

LUMENS:	176LM
CRI:	>91
CCT:	2700K
POWER:	2W
BEZEL:	Ø46
RECESS DEPTH:	18mm
BEAM:	100°
FINISHES:	Aluminium, bronze, white

ETTA EYELID

MINIMISE GLARE

When the viewing angle is likely to create a direct eye line to the fitting, consider using a low glare alternative such as the Etta Eyelid. The luminaire has a small baffle to shield your gaze from the light so just the effect is seen.

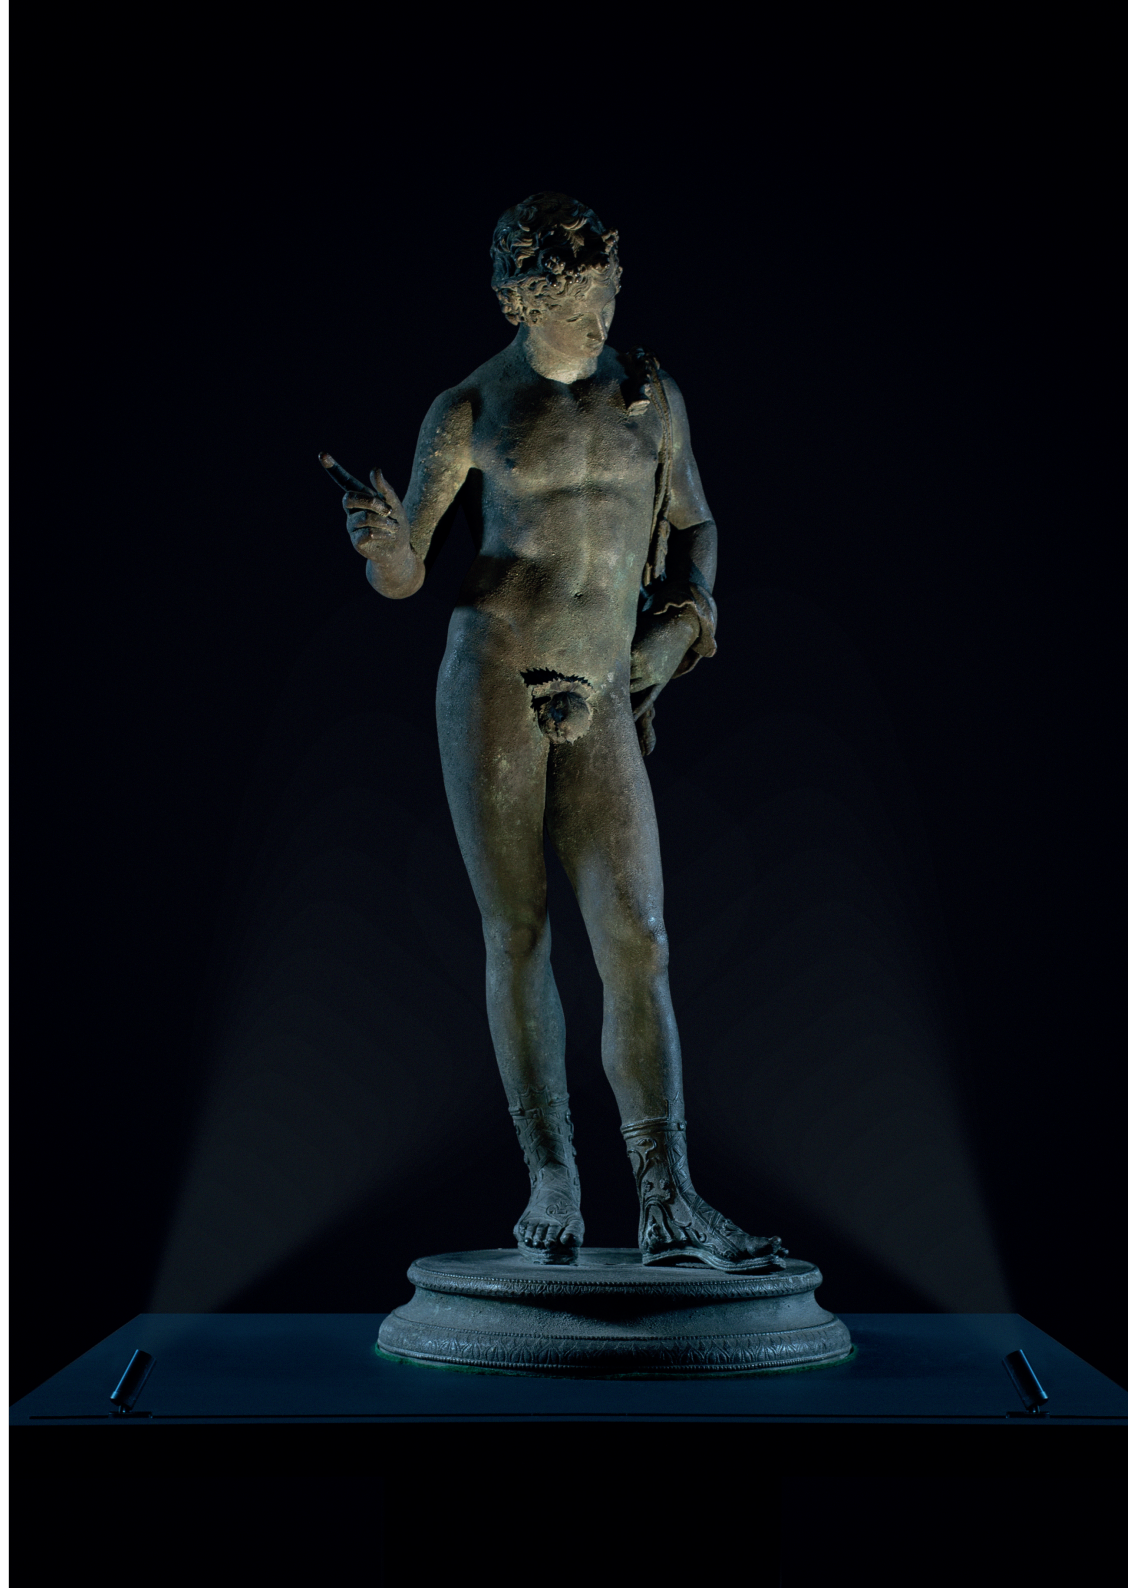

TECH SPEC

LUMENS:	158LM
CRI:	>91
CCT:	2700K
POWER:	2W
BEZEL:	Ø46
RECESS DEPTH:	18mm
BEAM:	100°
FINISHES:	Aluminium, bronze, white
